Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 99 and 101 are objected to because of the following informalities: In claim 99, line 2, "when said slot when said engagement member" is grammatically incorrect. In claim 101, lines 9-11, it is not clear in what sense the inhibiting member 230 in elected embodiment of fig. 14 is "fixed relative" to the housing, since the pin is unscrewed relative to the housing to be retractable relative to the slot engagement member. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 96-105 are rejected under 35 U.S.C. 102(e) as being anticipated by Carl et al (685)

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Carl teaches a portable electronic device including a slot for cooperation with a housing 36, a slot engagement member 52, a slot engagement portion (the portion of member 52 which is received in the computer slot), a locking member 54 movable relative to the slot between locked and unlocked positions, and an inhibiting member 60 coupled to the housing and within the slot when the slot engagement portion is in the locked position, and a locking cable for attaching to another object. The inhibiting member 60 extends through the housing and the slot engaging portion is regarded as being complementary to dimensions of the slot. The inhibiting member is retractable relative to the slot engagement by the axial bias provided by spring 62. Also, the inhibiting member 60 is retractable relative to the slot engagement member 52, and the slot engagement 52 is projectable relative to the inhibiting member 60 in view of the pin 44 lying within the groove 66, which is disclosed in column 4, lines 64-68 of Carl et al as allowing axial movement of spindle 46 and slot engagement portion 52 relative to the housing and inhibiting member 60.

Applicant's arguments with respect to claims 96-105 have been considered but are moot in view of the ground(s) of rejection as set forth above.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
